

XM radio is the best media invention to come about in many years. I bought mine on the count of bad stations and reception in the many cities and states I travel to. Being able to hear the weather and traffic updates before I go to certain locations is very important to me. XM radio provides me this information. I want the best service possible to me and XM radio provides it! I still have the choice to tune into local channels if I want or need too. Leave XM radio alone!
